Lesson Summary

typeable characters	309	
typed characters	349	309 typeable characters + 10 incorrectly typed + 9 collaterally typed before backspacing + 20 backspaces
unproductive keystroke overhead	13%	$\dfrac{349 \text{ typed characters} - 309 \text{ typeable characters}}{309 \text{ typeable characters}}$
elapsed time	1:32	
wpm	40	$\dfrac{309 \text{ typeable characters}}{5 \text{ characters per word}} \times \dfrac{1}{1:32}$
